U. S. A.

Dear Prof. Kaplan:

Thank you for your letter of October 4, 1992.

We are glad to comply with your request and to send you an application form for a Lady Davis Visiting Professorship tenable at either the Hebrew University of Jerusalem or the Technion-Israel Institute of Technology in the 1993/94 academic year. Enclosed is also a descriptive brochure on the Fellowship program.

Please note that the completed form together with the supplementary documents (all of which to be submitted in duplicate) must reach this office not later than November 30, 1992.

Sincerely yours,

Tova Wilk
Executive Secretary

Dr. Varda Soskolne
Hebrew University of Jerusalem
Hadassah School of Public Health
PO Box 1172
Jerusalem 91010
ISRAEL

Dear Dr. Soskolne,

I am a professor at Yale University who has been conducting AIDS research for the last several years. My research focuses on the design and evaluation of AIDS intervention programs, and on the mathematical modeling of HIV transmission dynamics. Currently, I am the principal investigator evaluating New Haven, Connecticut's legal needle exchange program. I am also studying the cost-effectiveness of anti-retroviral therapy, including the optimal design of AIDS clinical trials. In the past, I have investigated the effectiveness of self-deferral in protecting the blood supply prior to the availability of HIV testing, and modeled the likely impacts of programs targeted towards changing sexual behavior on HIV transmission dynamics.

I am interested in visiting Israel for one academic semester (Fall 1993 or Spring 1994) to conduct collaborative AIDS research in the Israeli setting, perhaps teach Israeli students, and continue some of my own projects. A potential vehicle for supporting such a visit is the Lady Davis Visiting Professorship, which would provide salary support and a modest travel/housing allowance. However, to apply to the Lady Davis Fellowship Trust for such an award, it is necessary to have a host scholar and academic department at either the Hebrew University or the Technion (though I imagine the only resource commitment from the host department is office space).

I know of your AIDS research through the International Conference on AIDS, thus I am writing to see if you might have any interest in my potential visit. I realize this is sudden, but I only became aware of the Lady Davis award recently, and I am under time pressure to submit the application by the deadline of November 30.

Dear Prof. Kaplan,

I was very excited to receive your letter with your suggestion to visit Israel for one academic semester next year. We can certainly work out a program of interest both to you and to me and to various other professionals at the School of Public Health and at the Hadassah Hospital. I would like to show your letter and resume to other people, and especially to Prof. Hava Palti, Director of the School of Public Health. However, most people are away this week for the Jewish holidays, so it will have to wait for a few days.

I am looking forward to this possible collaboration and I will write to you again next week. Meanwhile, if there are any guidelines of the Lady Davies Fellowship Trust which are required to be completed on our side, please send it to me.

Sincerely yours,

Varda Soskolne, Ph.D
Department of Social Medicine

Dear Ms. Wilk,

Enclosed please find my application materials for a Lady Davis Visiting Professorship. If awarded, I plan to spend one semester at the Hadassah School of Public Health, Hebrew University of Jerusalem pursuing collaborative AIDS research and teaching. I have completed the application form in duplicate, submitted two copies of my resume, and two copies of my research statement (which provides a tour of my publications, as well as a publications list). Please let me know if you require any further information. Until I hear from you next, I remain

Professor Edward H. Kaplan
Yale School of Organization & Management
New Haven, CT. 06520-7368
U.S.A.

Dear Professor Kaplan:

It is a pleasure to extend to you on behalf of the Hebrew University a cordial invitation to be a Lady Davis Visiting Associate Professor in the Faculty of Medicine for a period of one semester during the 1993-94 academic year.

The dates of the semesters are :

First semester - October 17, 1993 - January 21, 1994

Second semester - February 20, 1994 - June 17, 1994

A letter specifying the terms of your appointment is being sent to you concurrently by the Secretariat of the Trust.

Please keep in contact with Dr. Varda Soskolne in the Department of Social Medicine concerning your visit.

With all good wishes for a pleasant and fruitful stay at the Hebrew University,

Sincerely yours,

Hanoch Gutfreund
Rector

Professor Edward H. Kaplan
Yale School of Organization & Management
New Haven, CT. 06520-7368
U.S.A.

Dear Professor Kaplan:

On behalf of the Lady Davis Fellowship Trust I extend to you our warm congratulations on your appointment as Visiting Professor at the Hebrew University for one semester (4 months) during

The terms of your appointment will be:

1. Stipend. This will be equivalent to the salary of a Full Professor at the University. Payment will be made in Israel during the time that you will spend at the University and the stipends are adjusted in accordance with the cost-of-living index.

The stipend is not tax-free for U.S. citizens. Information on tax exemption is available from the Trust.

2. Travel. The Trust will provide you with a first-class airfare from New Haven. The arrangement will be made by the Trust.

3. Housing. The University will assist in finding suitable housing and the Trust will allocate U.S. \$ 250 (in New Haven) per month.

We would be grateful if you could give mention of your appointment as Davis Visiting Professor in your curriculum vitae and that may result from the work you will be doing as a Professorship.

We hope to hear from you in due course.

Sincerely,

T.W.

Paul W. MacAvoy, Dean
Yale School of Organization and Management

Dear Paul,

Good news! I just found out yesterday that I will be a Lady Davis Visiting Professor at the Hebrew University of Jerusalem next spring! Among other things, I hope to work with the School of Public Health and the Medical School there to develop a national evaluation plan for Israel's AIDS intervention programs, with special focus on recently arrived Ethiopian immigrants.

I haven't received the formal announcement from the Lady Davis Trust yet, having been informed by FAX from my sponsor at Hebrew University. However, once I do get the official word, I'll send you a copy.

Cheers!

Edward H. Kaplan

Dear Edward:

Your letter arrived as we were encountering another ferocious cycle of snow, sleet and rain blizzards in Connecticut. The description you provide of home and office is too much to endure. Therefore, I cannot circulate it among your friends on the faculty.

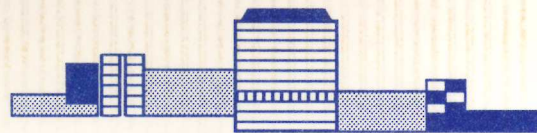

With best wishes.

Sincerely,

Paul W. MacAvoy

TO WHOM IT MAY CONCERN:

We write regarding the possibility of applying for research funds from your foundation to conduct a study of an HIV intervention program in a most interesting setting. The program targets Ethiopian immigrants to Israel. By way of background, in May 1991, about 14,000 Ethiopians were airlifted to Israel over one weekend, with an additional 5,000 arriving throughout that year. This group of recent immigrants comprises a unique population, in that they have left a developing country where the risk of HIV transmission is high, to a society where HIV transmission risks in general are low. In Ethiopia, some were exposed to HIV through sexual contacts, or via traditional medical practices such as traditional medical procedures.

They were examined for various health conditions, including HIV, on arrival in Israel. It was found that the prevalence of HIV was about 1.5%, 10 times more than the rest of the Israeli population. There are also more recent (1993) Ethiopian immigrants

who are mainly from rural areas, and are living in a structure based on extended families, with strong rural traditions, many of which revolve around traditional practices. This community has remained relatively isolated, and the risk of a serious HIV epidemic is high. The community chooses sexual partners almost exclusively within the community. It is perhaps not surprising that it is difficult to reach the community with HIV care and prevention programs, and this is a potential for further stigmatizing Ethiopian AIDS-related issues in their community.

A national HIV/AIDS education program for Ethiopian immigrants was implemented during 1992-93 by a team from the School of Public Health and Community Medicine. The program focused on health beliefs and practices of the community, and on programs concerning sexuality and sexual health. The team's related experience working with target populations was a key factor to reach. Two of the present authors (Dr. Kaplan and Dr. Rosen) led the original team that developed, implemented, and evaluated the program.

Dear Prof. Kaplan,

We have made for you the following reservations:

March 21, 1994

ALITALIA Flight AZ747

Departure time 5.20 pm (Tel Aviv)

Arrival time 8.00 pm (Rome)

March 30, 1994

ALITALIA Flight AZ732

Departure time 4.45 pm (Rome)

Arrival time 8.05 pm (Tel Aviv)

You will find your tickets in the Airport of Tel Aviv at ALITALIA desk.

The travel agent is EIS and the agent who made the reservations is named Rosy (tel. 39-6-6871534 - fax 39-6-68806945)

We have also reserved, for that period, a room for you at the Hotel Villa Torlonia, Via B. Eustachio n. 3/5/7/7a - Rome.

If you have any questions please contact me at the number 39/6/8610040.

We are looking forward to seeing you soon here.

Best regards.

Yours sincerely.

נושא הסמינר

"Operational Modeling of Needle Exchange Programs"

ABSTRACT

Needle exchange has been advocated as an AIDS intervention with the intent of slowing HIV transmission via shared drug injection equipment. The large majority of published needle exchange evaluation studies have relied on changes in self-reported risky behaviors such as needle sharing on the part of participating drug injectors as data demonstrating the impact of needle exchange. This talk describes an alternative approach to needle exchange evaluation that relies solely on objectively observed operational data such as the volume of needles distributed, the dates of program visitation, the circulation time of needles, and the fraction of returned needles that test positive for HIV. The approach highlights the "physics" of needle exchange by showing how the exchange of needles leads to reductions in needle circulation times that in turn bring about a reduction in the level of HIV infection in circulating needles. Application of this approach to the New Haven needle exchange program yields substantial evidence suggesting that HIV transmission has been slowed significantly among program participants.

נשמח לראותכם!

AT YOUR OWN RISK

centage of women making up the new HIV cases is even higher – 63 of the 176 new HIV cases tracked in 1993 were women, compared to 104 men.

Physicians in the field and AIDS activists alike warn that the old concept of high-risk groups is no longer valid. AIDS is not just a "gay disease." Dr. Avi Hassner, a Tel Aviv internist who is one of five board members of the Israel AIDS Task Force, says there is a "slow shift" from the homosexual population, with a greater part of each year.

Statistics, however, are contract- sexual sex. "It doesn't ask you have, or how that's the frightening concept of risk in a risk group. Anyone who has been in a risk group."

Newman also points out that the age group with the greatest increase in new cases is young people between 15 and 24. "A lot of college kids are wearing condoms," she says. "They're much more aware of the dangers. But the younger kids, the army crowd, think they're invulnerable."

Newman is particularly concerned about alerting heterosexual women to the dangers

Dear Professor Kaplan :

Thank you very much for sending us your detailed and interesting report of June 6, 1994.

We are pleased to note that, in addition to devoting time to research work, you presented talks at the Hebrew University and elsewhere and supervised an MPH student on his thesis at the Faculty of Medicine. Indeed a most productive visit which, we trust, was also enjoyable.

We would appreciate receiving reprints of the papers and of the title page of your book in which the support of the Lady Davis Fellowship Trust will be acknowledged.

With all good wishes,

Sincerely yours,

Tova Wilk

Prof. Edward H. Kaplan
Yale School of Organization and Management
Box 1A
New Haven, CONN. 06520-7368
U. S. A.

Dear Prof. Kaplan:

Thank you for sending us reprints of "A circulation theory of needle exchange" and of "Aids policy modelling by example", as well as of the title page of the book "Modelling the Aids Epidemic".

We greatly appreciate your mentioning the support of the Lady Davis Fellowship Trust in these publications.

With all good wishes,

Sincerely yours,

Tova Wilk
